Agrément Certificate
**09/4647**
**Product Sheet 1**

# PURUS FLOOR GULLIES

## PRODUCT SCOPE AND SUMMARY OF CERTIFICATE

This Certificate of Confirmation relates to Purus Floor Gullies, for use inside buildings to receive wastewater from floors in wet rooms and walk-in showers.

### AGRÉMENT CERTIFICATION INCLUDES:

- factors relating to compliance with Building Regulations where applicable
- factors relating to additional non-regulatory information where applicable
- independently verified technical specification
- assessment criteria and technical investigations
- design considerations
- installation guidance
- regular surveillance of production
- formal three-yearly review.

### KEY FACTORS ASSESSED

**Mechanical resistance and stability** — the products will have adequate strength to resist the loads experienced under normal service conditions (see section 5).

**Hygiene, health and the environment** — the products will allow disposal of wastewater without clogging (see section 6).

**Safety in use** — the products are safe in use (see section 7).

**Durability** — the products will have adequate durability (see section 9).

The BBA has awarded this Agrément Certificate to the company named above for the products described herein. These products have been assessed by the BBA as being fit for their intended use provided they are installed, used and maintained as set out in this Certificate.

On behalf of the British Board of Agrément

Date of First issue: 3 April 2009

Brian Chamberlain
Head of Approvals — Engineering

Greg Cooper
Chief Executive

*The BBA is a UKAS accredited certification body — Number 113. The schedule of the current scope of accreditation for product certification is available in pdf format via the UKAS link on the BBA website at www.bbacerts.co.uk*

*Readers are advised to check the validity and latest issue number of this Agrément Certificate by either referring to the BBA website or contacting the BBA direct.*

# Regulations

In the opinion of the BBA, Purus Floor Gullies, if used in accordance with the provisions of this Certificate, will meet or contribute to meeting the relevant requirements of the following Building Regulations:

**The Building Regulations 2000 (as amended) (England and Wales)**

| | | |
|---|---|---|
| Requirement: | H1(1) | Foul water drainage |
| Comment: | | The products will contribute to meeting the regulatory requirements. See sections 6.1 to 6.5 of this Certificate. |
| Requirement: | Regulation 7 | Materials and workmanship |
| Comment: | | The products are acceptable. See sections 9.1 to 9.4 and the *Installation* part of this Certificate. |

**The Building (Scotland) Regulations 2004 (as amended)**

| | | |
|---|---|---|
| Regulation: | 8(1)(2) | Fitness and durability of materials and workmanship |
| Comment: | | The products satisfy the requirements of this Regulation, with reference to clauses 0.8.2[1] to 0.8.4[1]. See sections 8.1 to 8.4, 9.1 to 9.4 and the *Installation* part of this Certificate. |
| Regulation: | 9 | Building standards — construction |
| Standard: | 3.7(b) | Wastewater drainage |
| Comment: | | The products will contribute to meeting the requirements of this Standard, with reference to clause 3.7.1[1]. See sections 6.1 to 6.5 of this Certificate. |

(1) Technical Handbook (Domestic).

**The Building Regulations (Northern Ireland) 2000 (as amended)**

| | | |
|---|---|---|
| Regulation: | B2(a)(i) | Fitness of materials and workmanship |
| Comment: | | The products are acceptable. See sections 9.1 to 9.4 and the *Installation* part of this Certificate. |
| Regulation: | B3(2) | Suitability of certain materials |
| Comment: | | The products are acceptable. See sections 8.1 to 8.4 of this Certificate. |
| Regulation: | N4(a)(i)(b) | Underground foul drainage |
| Comment: | | The products will contribute to meeting the stated requirements. See sections 6.1 to 6.5 of this Certificate. |

**Construction (Design and Management) Regulations 2007**
**Construction (Design and Management) Regulations (Northern Ireland) 2007**

Information in this Certificate may assist the client, CDM co-ordinator, designer and contractors to address their obligations under these Regulations.

See section: *7 Safety in use* (7.1 and 7.2).

# Non-regulatory Information

## NHBC Standards 2008

NHBC accepts the use of Purus Floor Gullies, when installed and used in accordance with this Certificate, in relation to *NHBC Standards*, Chapter 8.1 *Soil and waste systems*, D16 and D17.

## Zurich Building Guarantee Technical Manual 2007

In the opinion of the BBA, Purus Floor Gullies, when installed and used in accordance with this Certificate, satisfy the requirements of the *Zurich Building Guarantee Technical Manual*, Section 3 *Substructure*, sub-section *Drainage*.

# General

This Certificate relates to Purus Floor Gullies for internal use to receive wastewater from floors in wet rooms and walk-in showers.

The products are for use inside domestic, commercial and public buildings with gravity drainage systems installed in accordance with BS EN 12056-1 : 2000, BS EN 12056-2 : 2000, BS EN 12056-3 : 2000 and BS EN 12056-5 : 2000 for the conveyance of surface water and domestic sewage as is permitted to be discharged into public sewers by the Water Industry Act 1991, and surface water and sewage as is permitted and defined by the Sewerage (Scotland) Act 1968 and the Water and Sewerage Services (Northern Ireland) Order 1973.

It is important for designers, planners, contractors and/or installers to ensure that the installation of the gullies is in accordance with the Certificate holder's instructions and the information given in this Certificate.

The products are manufactured in Sweden by the Certificate holder and marketed in the UK by Purus Ltd.

This Certificate is a Confirmation of the Swedish Technical Approvals issued by SITAC[1] to Purus AB.

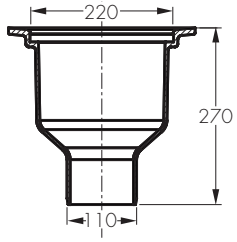
(1) Swedish Institute for Technical Approval in Construction.

## 1 Description

1.1 The Purus Floor Gullies covered by this Certificate are available in plastic, stainless steel and epoxy-coated cast iron, in various types and sizes as detailed in Tables 1 to 16.

*Table 1 Details of HEAVY*

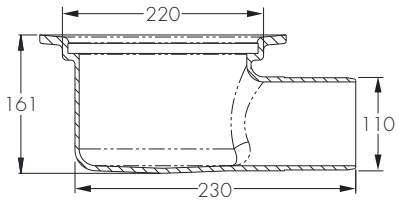
| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 710 28 36 | HEAVY 75 R | stainless steel | 75 | 3.0 |
| 710 28 30 | HEAVY 75 P | stainless steel/ plastic | 75 | 3.0 |
| 710 28 37 | HEAVY 110 R | stainless steel | 110 | 6.0 |
| 710 28 29 | HEAVY 110 P | stainless steel/ plastic | 110 | 6.0 |



all dimensions in mm

*Table 2 Details of BIGG*

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 710 28 34 | BIGG 75 R | stainless steel | 75 | 3.0 |
| 710 28 22 | BIGG 75 P | stainless steel/ plastic | 75 | 3.0 |
| 710 28 35 | BIGG 110 R | stainless steel | 110 | 6.0 |
| 710 28 21 | BIGG 110 P | stainless steel/ plastic | 110 | 6.0 |

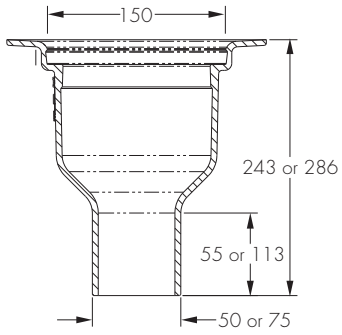


all dimensions in mm

*Table 3 Details of LOD*

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 710 21 74 | LOD 50 E, bottom outlet[1] | cast iron/ plastic | 50 | 2.0 |
| 710 21 72 | LOD MA 75 E, bottom outlet[1] | cast iron/ plastic | 75 | 3.0 |

(1) Including clamping ring and grating.

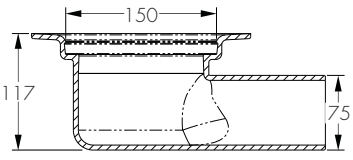


all dimensions in mm

*Table 4 Details of S/50 L MA 75 E*

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 710 26 51 | S/50 L MA 75 E, side outlet[1] | cast iron/ plastic | 75 | 3.0 |

(1) Including clamping ring and grating.

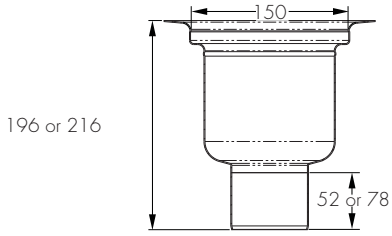


all dimensions in mm

## *Table 5 Details of BALDER*

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 711 80 89 | BALDER 50 R[1] | stainless steel | 50 | 2.0 |
| 711 80 90 | BALDER 50 P[1] | plastic | 50 | 2.0 |
| 711 80 81 | BALDER 75 R[1] | stainless steel | 75 | 3.0 |
| 711 80 70 | BALDER 75 P[1] | plastic | 75 | 3.0 |

(1) Including clamping ring and grating.

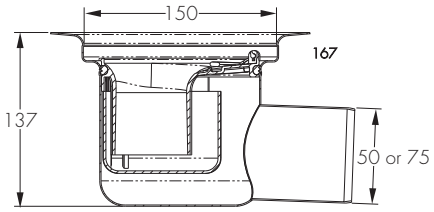


all dimensions in mm

## *Table 6 Details of SIGYN*

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 711 80 91 | SIGYN 50 R[1] | stainless steel | 50 | 2.0 |
| 711 80 92 | SIGYN 50 PI[1] | plastic | 50 | 2.0 |
| 711 80 85 | SIGYN 75 R[1] | stainless steel | 75 | 3.0 |
| 711 80 71 | SIGYN 75 P[1] | plastic | 75 | 3.0 |

(1) Including clamping ring and grating.



all dimensions in mm

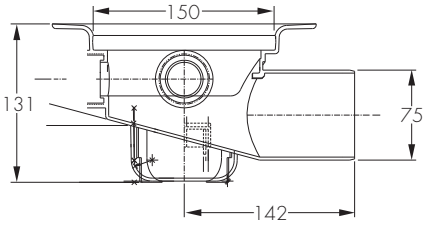
## *Table 7 Details of BRAGE MINI/ODEN MINI*

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 711 35 38 | BRAGE MINI 110 | polypropylene | 110 | 6.0 |
| 711 35 36 | BRAGE MINI 50 | polypropylene | 50 | 2.0 |
| 711 35 35 | ODEN MINI 50 | polypropylene | 50 | 2.0 |

## *Table 8 Details of VAKE*

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 711 35 80 | VAKE[1] | polypropylene | 75 | 3.0 |

(1) Including clamping ring and grating.

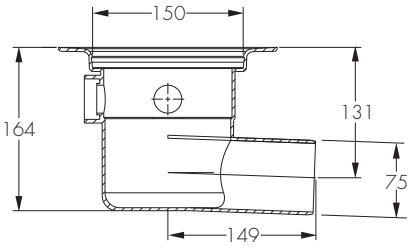


all dimensions in mm

## *Table 9 Details of VAGE*

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 711 35 98 | VAGE[1] | polypropylene | 75 | 3.0 |

(1) Including clamping ring and grating.

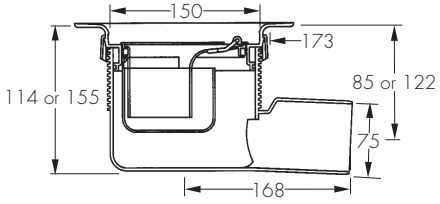


all dimensions in mm

## Table 10 Details of FLEX

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 711 35 91 | FLEX[1] | polypropylene | 75 | 3.0 |

(1) Including clamping ring and grating.

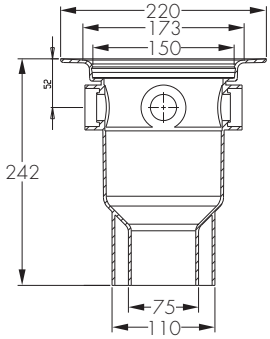


all dimensions in mm

## Table 11 Details of LOKE

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 711 35 88 | LOKE[1] | polypropylene | 75/110 | 3.0 |

(1) Including clamping ring and grating.

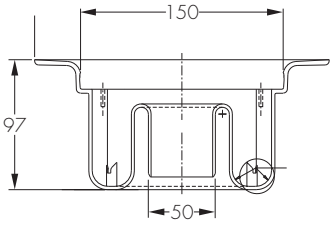


all dimensions in mm

## Table 12 Details of DUSCHBRUNN

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 711 35 27 | SHOWER GULLY[1] | ABS plastic | 50 | 2.0 |

(1) Including clamping ring and grating.

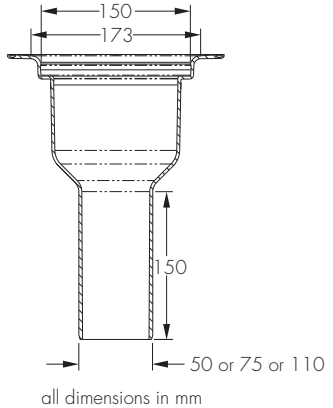


all dimensions in mm

## Table 13 Details of BRAGE

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 711 39 27 | BRAGE 50[1] | ABS plastic | 50 | 2.0 |
| 711 39 29 | BRAGE 75 KM[1] | polyethylene | 75 | 3.0 |
| 711 39 25 | BRAGE 75[1] | ABS plastic | 75 | 3.0 |
| 711 39 30 | BRAGE 75 PP[1] | polypropylene | 75 | 3.0 |
| 711 39 28 | BRAGE 110[1] | polyethylene | 110 | 6.0 |

(1) Including clamping ring and grating.

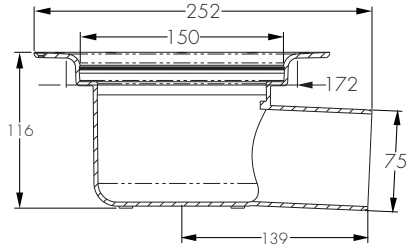


all dimensions in mm

*Table 14 Details of ODEN*

| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 711 35 22 | ODEN[1] | polypropylene | 75 | 3.0 |

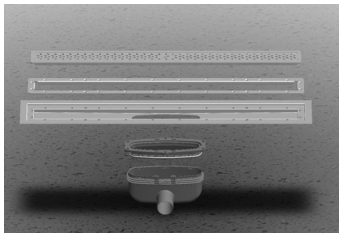
(1) Including clamping ring and grating.



all dimensions in mm

*Table 15 Details of LINE/CORNER*

| Product code | Description (mm) | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 711 37 09 | LINE: in lengths of 300, 600, 700, 800, 900 or 1000 | stainless steel | 75 | 3.0 |
| | CORNER: triangle dimensions of 300 x 300 x 420 | stainless steel | 75 | 3.0 |



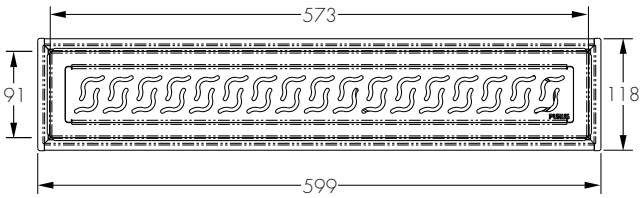


*Table 16 Details of MINIMAX*

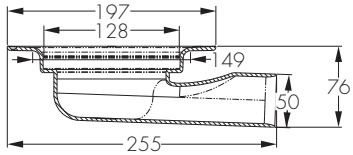
| Product code | Description | Material | Outlet diameter (mm) | Capacity ($ls^{-1}$) |
|---|---|---|---|---|
| 711 37 64 | MINIMAX 50 | polypropylene | 50/75 | 2.0 |
| 711 37 65 | MINIMAX TRAP | polypropylene | 50/75 | 2.0 |

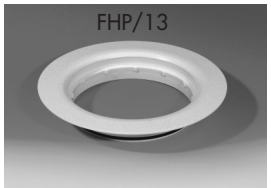


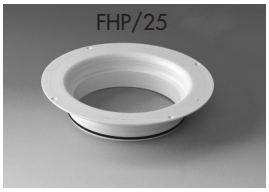
all dimensions in mm

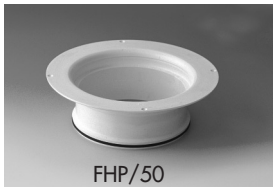
1.2 Extension rings allow the gully height to be varied to suit the application (see Tables 17 and 18).

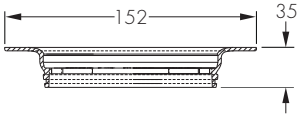
*Table 17 Details of extension rings (FHP)*

| Product code | Description | Material | diameter x height (mm) |
|---|---|---|---|
| 713 36 25 | FHP/13 | ABS plastic | 150 x 13 |
| 713 36 14 | FHP/25 | ABS plastic | 150 x 25 |
| 713 36 22 | FHP/50 | ABS plastic | 150 x 50 |
| 713 36 48 | FHP/100 | ABS plastic | 150 x 100 |





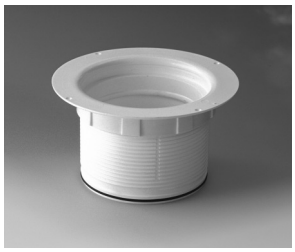




all dimensions in mm

*Table 18 Details of extension ring (FHP/FLEX)*

| Product code | Description | Material | diameter x height (mm) |
|---|---|---|---|
| 713 36 49 | FHP/FLEX | ABS plastic | 150 x 35 to 107 |



1.3 Continuous quality control is exercised during manufacture including regular checks on appearance, dimensions, marking and loading classification. An inspection body on behalf of SITAC is responsible for ensuring that product quality is maintained.

1.4 The gullies and their accessories are marked with the manufacturer's name, product type, code, date of manufacture and approval number.

### 2 Delivery and site handling

2.1 Purus Floor Gullies are supplied in cardboard boxes.

2.2 The products are of robust construction but rough handling (eg dropping on hard floor) may cause distortion of such features as seals, grating, extension rings. Damaged items should be discarded.

## Assessment and Technical Investigations

The following is a summary of the assessment and technical investigations carried out on Purus Floor Gullies.

## Design Considerations

### 3 General

Purus Floor Gullies are satisfactory for use as receptacles located inside buildings for disposing of wastewater from floors in wet rooms and walk-in showers.

### 4 Practicability of installation

4.1 These products are designed to be installed by a competent general builder, or a contractor, experienced with these type of products.

4.2 The products can be installed in either timber or concrete floors using purpose-made accessories.

### 5 Mechanical resistance and stability

5.1 The gullies will have adequate resistance to the loadings likely to be experienced under normal service conditions in the areas of use as defined in this Certificate.

5.2 The gratings, extension rings and clamping rings will have adequate strength and stability.

5.3 The products may be regarded as having a Class K 3 rating in accordance with BS EN 1253-1 : 2003.

### 6 Hygiene, health and the environment

6.1 The floor gullies have adequate flow characteristics and will allow disposal of wastewater without clogging.

6.2 The products will provide water seal depths in excess of 50 mm.

6.3 Trapped gullies and gully bodies have adequate odour and watertightness.

6.4 Products for use with sheet floor covering will have adequate watertightness.

6.5 If an extension ring is used, the joint between the ring and the gully body will provide a watertight seal.

6.6 In a fire, gullies made of polypropylene will burn to form carbon dioxide and water.

### 7 Safety in use

7.1 The products are free from sharp edges that can impair performance or cause injury to persons.

7.2 The gratings have apertures suitable for adequate performance and safety.

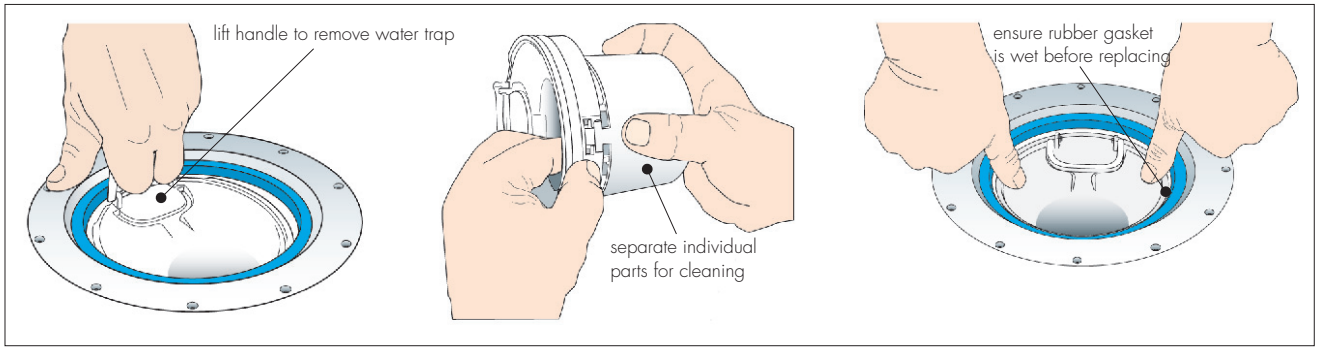
### 8 Maintenance

8.1 Sections of the floor gullies can be removed easily for cleaning or replacement.

8.2 With traps removed, the pipework can be rodded easily using either cane or polypropylene rods with a cleaning coil head.

8.3 The removable traps are cleaned easily using a soft brush (see Figure 1).

*Figure 1 Maintenance*



8.4 Adequate access for cleaning is provided on gullies so equipped. Trapped gullies which cannot be cleaned through a cleaning port or by removing the trap will have satisfactory performance.

## 9 Durability

9.1 When used within the conditions and recommendations given in this Certificate, the products will have adequate durability.

9.2 The products will resist all thermal cycling conditions likely to occur in effluents from the areas of use defined in this Certificate. In particular, gullies for use with sheet floor covering can adequately resist such conditions.

9.3 The products are resistant to corrosion.

9.4 The products will be unaffected by the types and quantities of chemicals likely to be found in wastewater from wet floors or effluents from domestic appliances.

# Installation

## 10 General

10.1 Installation must be carried out in accordance with the Certificate holder's instructions and BS EN 12056-1 : 2000, BS EN 12056-2 : 2000 and BS EN 12056-3 : 2000 and BS EN 12056-5 : 2000.

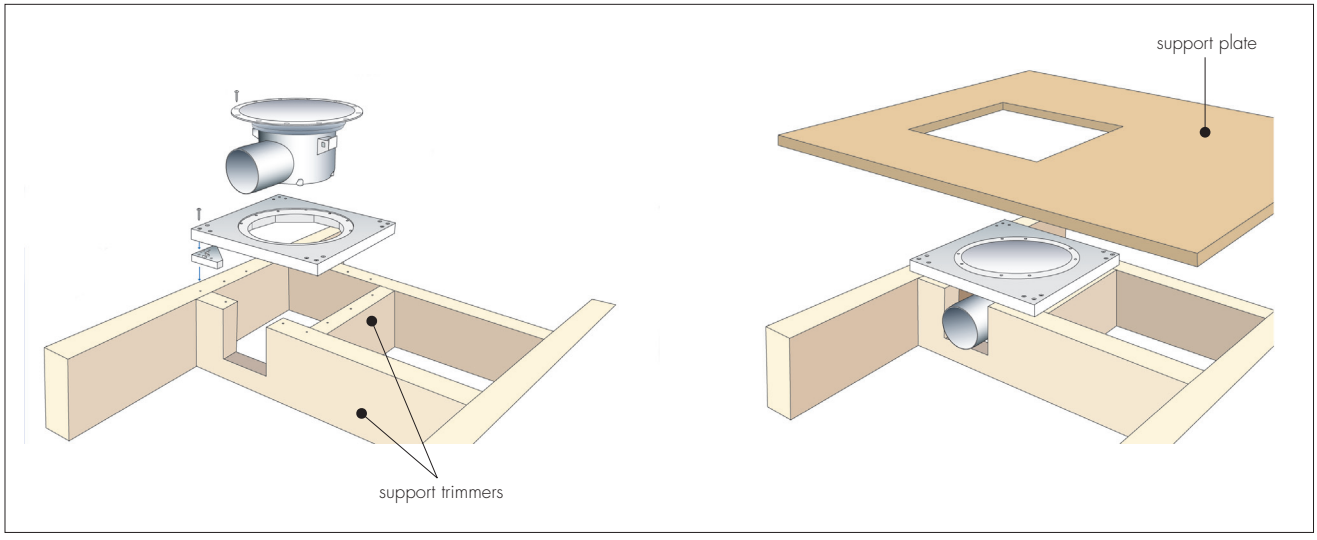
10.2 Floors fitted with Purus Floor Gullies must be designed to allow the water to flow freely to the gratings and incorporate an effective damp-proof membrane in accordance with CP 102 : 1973, BS 8102 : 1990 and BS 8215 : 1991.

## 11 Procedure

### Timber floors

11.1 Support trimmers are fixed to the main floor joists to suit gully dimensions (see Figure 2).

*Figure 2 Installation in timber floors*



11.2 A purpose made support plate is fixed to the trimmers/joists with galvanized or stainless steel screws.

11.3 The gully body is positioned under the support plate and, after adjustment, secured to it using the screws provided.

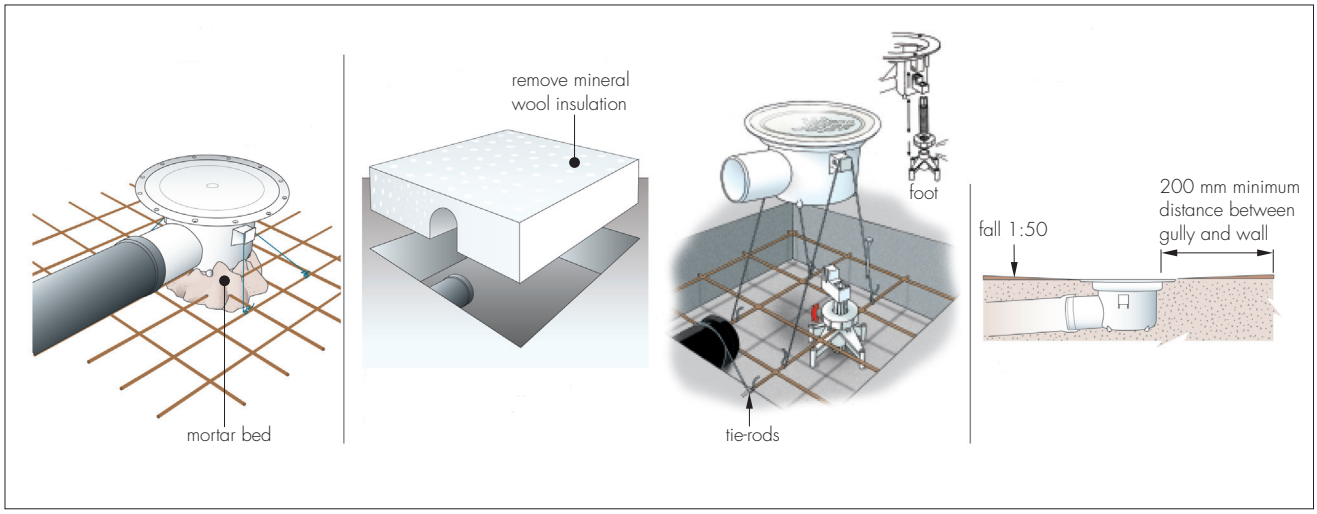
11.4 Floor boards are cut to suit the support plate up-stand and fixed to the trimmers/joists, using screws, as normal.

### Concrete floors

11.5 The gully is placed on a bed of mortar and its level/position adjusted as necessary.

11.6 To help keep it in place during concrete pour, the gully is tied to the reinforcement using the lugs provided on its body (see Figure 3).

*Figure 3 Installation in concrete floors*



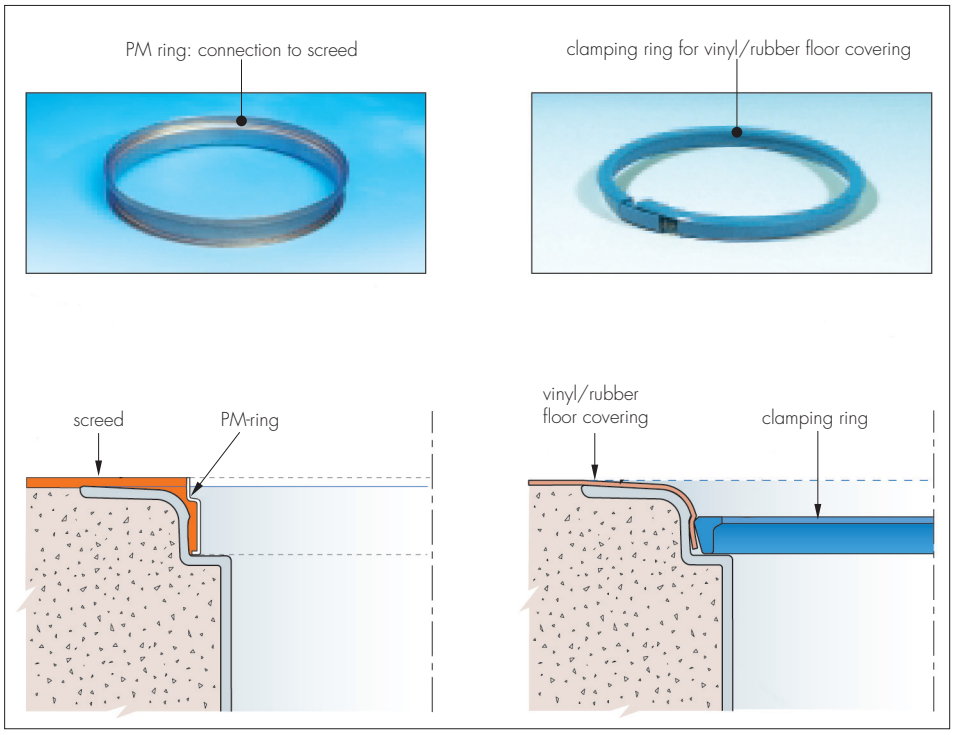
11.7 If the outlet pipe is installed first, a recess in the floor slab is made. The gully is then connected to the pipe end and concrete poured in the recess as normal (see Figure 3).

11.8 To facilitate level adjustment, a specially designed adjustable foot can be used (see Figure 3).

### Vinyl/rubber floor coverings

11.9 Special clamping rings allow the floor covering to be attached around the gully (see Figure 4).

*Figure 4 Installation with vinyl/rubber floor coverings*



# Additional Information

The management systems of Purus AB have been assessed and registered as meeting the requirements of EN ISO 9001 : 2000 by SP Certification accredited by the Swedish Board for Accreditation and Conformity Assessment (Certificate 1590).

# Technical Investigations

## 12 Investigations

12.1 Based on the Swedish Technical Approvals and supporting data, and in accordance with the requirements of BS EN 1253-1 : 2003 and BS EN 1253-2 : 2003 and BS EN 274-1 : 2002, the products were assessed for:

- mechanical strength
- depth of water seal
- resistance of water seal to pressure
- blockage prevention
- position of side inlets
- odour and watertightness
- flow characteristics
- safety in use
- practicability of installation
- ease of maintenance
- resistance to thermal actions
- resistance to corrosion and chemicals.

12.2 The quality control procedures were examined and confirmation of the continuing surveillance by an inspection body, on behalf of SITAC, was obtained.

12.3 The manufacturer's literature was examined for any inconsistencies and general content.

## 13 Conditions

13.1 This Certificate:

- relates only to the product/system that is named and described on the front page
- is granted only to the company, firm or person named on the front page — no other company, firm or person may hold or claim any entitlement to this Certificate
- is valid only within the UK
- has to be read, considered and used as a whole document — it may be misleading and will be incomplete to be selective
- is copyright of the BBA
- is subject to English law.

13.2 Publications and documents referred to in this Certificate are those that the BBA deems to be relevant at the date of issue or re-issue of this Certificate and include any: Act of Parliament; Statutory Instrument; Directive; Regulation; British, European or International Standard; Code of Practice; manufacturers' instructions; or any other publication or document similar or related to the aforementioned.

13.3 This Certificate will remain valid for an unlimited period provided that the product/system and the manufacture and/or fabrication including all related and relevant processes thereof:

- are maintained at or above the levels which have been assessed and found to be satisfactory by the BBA
- remain covered by a valid Swedish Agrément; and
- are reviewed by the BBA as and when it considers appropriate.

13.4 In granting this Certificate, the BBA is not responsible for:

- the presence or absence of any patent, intellectual property or similar rights subsisting in the product/system or any other product/system
- the right of the Certificate holder to manufacture, supply, install, maintain or market the product/system
- individual installations of the product/system, including the nature, design, methods and workmanship of or related to the installation
- the actual works in which the product/system is installed, used and maintained, including the nature, design, methods and workmanship of such works.

13.5 Any information relating to the manufacture, supply, installation, use and maintenance of this product/system which is contained or referred to in this Certificate is the minimum required to be met when the product/system is manufactured, supplied, installed, used and maintained. It does not purport in any way to restate the requirements of the Health & Safety at Work etc Act 1974, or of any other statutory, common law or other duty which may exist at the date of this Certificate; nor is conformity with such information to be taken as satisfying the requirements of the 1974 Act or of any statutory, common law or other duty of care. In granting this Certificate, the BBA does not accept responsibility to any person or body for any loss or damage, including personal injury, arising as a direct or indirect result of the manufacture, supply, installation, use and maintenance of this product/system.
